Line post insulator is intended to be mounted rigidly on a supporting structure with the metal base attached by means of a stud or one or several bolts.

Horizontal clamp type line post insulator can be divided into porcelain horizontal clamp type line post insulator and polymer horizontal clamp type insulator.

Porcelain horizontal clamp type line post insulator:

Standard: ANSI C29.7

Color: brown, grey, gray, white

Types of ceramic horizontal clamp type line post insulator:

ANSI57-21, ANSI57-22, ANSI57-23, ANSI57-24, ANSI57-25

ANSI 57-31, ANSI57-32, ANSI57-33, ANSI57-34, ANSI57-35

Composite horizontal clamp type line post insulator:

Standard: ANSIC29.17, IEC61109

Color: Red, gray, grey

Tests of composite horizontal clamp type line post insulator:

- ✧ Design tests
- ✧ Type tests
- ✧ Sample tests
- ✧ Routine tests

Voltage class of horizontal clamp type line post insulator:

11kV, 22kV, 33kV, 69kV, 132kV
