Vertical clamp type line post insulator is the other type of line post insulator.

Line post insulator is intended to be mounted rigidly on a supporting structure with the metal base attached by means of a stud or bolt.

Vertical clamp type line post insulator can be divided into porcelain vertical type line post insulator and polymer vertical clamp type insulator.

Porcelain vertical clamp type line post insulator:

Standard: ANSI C29.7

Color: brown, grey, gray, white

Types of ceramic vertical clamp type line post insulator:

ANSI57-11, ANSI57-12, ANSI57-13, ANSI57-14,

ANSI57-15

Composite vertical clamp type line post insulator:

Standard: ANSIC29.17, IEC61109

Color: Red, gray, grey

Voltage class of vertical clamp type line post insulator: 11kV, 22kV, 33kV, 69kV, 132kV

Vertical clamp type line post insulator can be mounted on the wooden or steel cross arm as a good insulator.
